IBM Personal System/2 Model L40 SX Reference Summary

Approval Draft

Document Number 84F8511

IBM Personal System/2
Model L40 SX
Reference Summary

PICTURE 1

February 26, 1991

This Reference Summary provides a quick summary of information necessary for the operation of the IBM Personal System/2 Model L40 SX. Because this Reference Summary does not intend to cover all the operational information, refer to the PS/2 Model L40 SX Quick Reference, 84F7577 for further information.

The information herein is extracted from 84F7577.

#### Model L40 SX Reference Summary Economical Use of Your Computer

FRONT\_1 Economical Use of Your Computer

A battery-powered computer has limited power. To minimize the power usage and allow you to use your computer longer with a battery, do the following.

Close the display or turn off the power when you are not operating the computer.

Set the brightness and contrast controls as  $\dim$  as possible consistent with readability.

Set the Economy switch to  ${\bf A}$  position.

Using Set features, change the power management options as follows:

- Internal-Device Power Off

Set as low value as possible for each option. The Backlight especially should be the lowest possible value.

- System Speed

Computer processing speed affects power usage.

- -- If the Economy switch is set to **M** position:
  - Select the slower speed if possible.
- -- If the Economy switch is set to A position: Select Long Battery Life option.
- Power Control for Communication Devices

Specify Off for each serial and parallel port you do not use.

To start the Set features:

If your computer already has the Set features installed:

Type PS2 and press Enter at the command prompt.

If your computer does not have the Set features installed:

- 1. Start the Backup Reference Diskette.
- 2. Select Set features on the Main Menu.
- 3. Select **Set features menu** on the Set Features Main Menu.

For more information about the Set features, see the PS/2 Model L40 SX Quick Reference.

# Model L40 SX Reference Summary Charging the Rechargeable Battery

FRONT\_2 Charging the Rechargeable Battery

The rechargeable battery is automatically charged when this battery is installed and an AC adapter is plugged in. Charging is performed even when the computer is operating.

It takes approximately 10 hours to be fully charged.

# Model L40 SX Reference Summary Monitoring Battery Charging

FRONT\_3 Monitoring Battery Charging

- Open the display.
   Turn on the power switch.
   One of the following icons appears and indicates the battery charge.

| <br>  PICTURE 2      | Low charge  |
|----------------------|-------------|
| <br>  PICTURE 3      | Half charge |
| <br> <br>  PICTURE 4 | Full charge |

## Model L40 SX Reference Summary Checking Battery Power

FRONT\_4 Checking Battery Power

The amount of power remaining in the battery is shown with icons.

- Open the display.
   Turn on the power switch. One of the following icons appears to show the remaining power unless an external power device is connected.

The remaining power is always displayed in the system-status display as long as the power switch is on.

# Model L40 SX Reference Summary Checking Battery Power

## Model L40 SX Reference Summary Changing Your Power-On Password

FRONT\_5 Changing Your Power-On Password

Follow the instructions below to change your power-on password.

Warning: Be sure to note your new power-on password when you change the current one. If you forget it, the password needs to be canceled ( see "Canceling Your Power-On Password" in topic FRONT\_7).

- Turn on the computer.
   When the password prompt appears, type your current password, then press the key 1 located above the right ALT key.

  3. Type your new password (seven characters or less).

  4. Press Enter.

- 5. Note your password and store it in a safe place.

PICTURE 9

## Model L40 SX Reference Summary Removing Your Power-On Password

FRONT\_6 Removing Your Power-On Password

Follow the instructions below to remove your power-on password.

- Turn on the computer.
   When PICTURE 10 appears, type your current password, then press the key 1 located above the right ALT key (refer to the above figure).
- 3. Press Enter.

## Model L40 SX Reference Summary Canceling Your Power-On Password

FRONT\_7 Canceling Your Power-On Password

If you forget your power-on password, take the computer to an IBM Authorized Dealer or IBM for service. Positive proof of identification is required.

The Dealer or IBM may record the computer serial number and you may be charged for this service.

PS2 SET MAnual 20 | 10 | 5
```

Warning: To avoid data loss, set the manual speed to 20 MHz when using serial communications at a speed of above 9600 bps.

| + - | IMPORTANT   |  |
|-----|---|--|
| -   |   |  |
| -   | If this problem determination does not fix your computer problems,  |  |
| -   | always consult the "Solving Computer Problems" section described in |  |
| -   | the Quick Reference.  |  |

| +  | Check / Action   |
|--|--|
| Nothing<br>  displays with<br>  no beep.                           | Ensure that the rechargeable battery is fully charged and properly installed.  Try the same operation using the AC adapter.  1. Connect the AC adapter to the computer and plug the power cord into a working electrical outlet.  2. Turn on the power switch.  If the problem is fixed, suspect the rechargeable battery. |
| Nothing   displays with   one beep.                                | Adjust both Contrast and Brightness controls.  Check to see if <i>Display device</i> option specified by the Set Features program is correct.  When you use an external PS/2 display, power on the display and turn up the brightness control, then press Ctrl+Alt+Del.  |
| PICTURE 11   | The icon stays on: The computer is in Suspend Mode.  Is the rechargeable battery properly installed?  Is the battery fully charged?  The icon is blinking: The computer is returning to Resume Mode. Wait for a moment.  |
| PICTURE 12    Picture 12    This icon stays   on.                  | This icon appears when the temperature of the   computer is out of operating range. Power off the   computer and check to see if the computer has been:   Exposed to strong sunlight for a long period   Left in an enclosed car on a hot day   Left at a cold place for a long period.                                    |
| PICTURE 13    PICTURE 13    This icon stays   on.                  | This icon appears when condensation is detected. Power off the computer or close the computer display for a while.   |
| +  | No power left in the rechargeable battery.  Charge the rechargeable battery.  Note: Two beeps sound when this icon begins to blink.  |
| The serial port<br>  does not work.                                | Ensure that <i>Onboard Serial power</i> is set to <b>On</b> in the<br>  Set Features program.  |
| The modem or<br>  optional serial<br>  adapter does<br>  not work. | Check to see if Data/Fax Modem power or Serial<br>  Adapter power is set to <b>On</b> in the Set Features<br>  program.  |
| Printer attached to the parallel port does not work.               | Ensure that <i>Onboard Parallel power</i> is set to <b>On</b> in the Set Features program.   |
| Parallel power<br>  is not off.                                    | The parallel power can be removed only when both Onboard Serial power and Serial Adapter power are set to off.   |

# Model L40 SX Reference Summary If the Computer Does Not Work

|  | ·  |
|--|--|
|  | Set Onboard Serial power and Serial Adapter power to   Off in the Set Features program.  |
| 161, 162, or<br>  164 error code<br>  on the screen. | Start your backup Reference Diskette and follow the   instructions on the screen.  |
|  | Note: Automatic Configuration is necessary after installing an optional feature.   |
| Graphics<br>  display<br>  unreadable.               | Check the reverse video setting in the Set Features  <br>  program.  |
| Disk drive slow<br>  to operate.                     | Temperature may be too low. Power off or close the   computer display. Do not use until the computer is   at a temperature inside the specified operating   range. |
| All keys on the   keyboard do not   work.            | ·  |
|  | Enter your power-on password.  |
