- MODEL : MAGIC-PRO MP-6VIP-1394
- EDITION : July, 2000
- VERSION : 1.1

## Federal Communications Commission Statement

This device complies with FCC Rules Part 15. Operation is subject to the following two conditions:

- This device may not cause harmful interference
- This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy. If this equipment is not installed and used in accordance with the manufacturer's instructions, it may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The use of shielded cables for connection of the monitor to the graphics card is required to assure compliance with FCC regulations. Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

### Canadian Department of Communications Statement

This digital apparatus does not exceed the Class B limits for audio noise emissions from digital apparatusses set out in the Radio Interference Regulations of the Canadian Department of Communications.

### Manufacturer's Disclaimer Statement

The information in this document is subject to change without notice and does not represent a commitment on the part of the vendor. No warranty or representation, either expressed or implied, is made with respect to the quality, accuracy or fitness for any particular purpose of this document. # How This Manual Is Organized

This manual is divided into the following sections:

1) Item Checklist	Product item list
2) Features	Product information & specification
3) Hardware Setup	Instructions on setting up the motherboard
4) Performance & Block Diagram	Product performance & block diagram
5) Suspend to RAM	Instructions STR installation
6) BIOS Setup	Instructions on setting up the BIOS software
7) Appendix	General reference

Table Of Content	
Item Checklist	P.1
Summary of Features	P.3
MP-6VIP-1394 Motherboard Layout	P.5
Page Index for CPU Speed Setup/Connectors/Panel and Jumper Definition	P.6
Performance List	P.30
Block Diagram	P.31
Suspend to RAM Installation	P.32
Memory Installation	P.38
Page Index for BIOS Setup	P.39
Appendix	P.67

Item Checklist

# Item Checklist

The MP-6VIP-1394 motherboard
 Cable for IDE / floppy device
 CD for motherboard driver & utility
 Internal COM B Cable (Optional)
 Internal USB Cable (Optional)

☑MP-6VIP-1394 user's manual

# **CPU Speed Setup**

The system bus speed is selectable at 66,100,133MHz and Auto. The user can select the system bus speed **(SW1)** and change the DIP switch **(SW2)** selection to set up the CPU speed for 300 - 733MHz processor.

## SW1:

O : ON, X : OFF

							,
CPU	PCI CLK	1	2	3	4	5	6
Auto	33.3	Х	Х	Х	Х	0	0
66	33.3	0	0	Х	Х	Х	Х
75	37.5	0	0	0	Х	Х	Х
83	41.6	0	0	Х	0	Х	Х
100	33.3	0	Х	Х	Х	Х	Х
112	37.3	0	Х	0	Х	Х	Х
124	31	Х	Х	Х	0	Х	Х
133	33.3	Х	Х	Х	Х	Х	Х
140	35	Х	Х	0	0	Х	Х
150	37.5	Х	Х	0	Х	Х	Х

●<sup>™</sup> The CPU speed must match with the frequency RATIO. It will cause system hanging up if the frequency RATIO is higher than that of CPU.

### SW2:

	DIP SWITCH				
FREQ. RATIO	1	2	3	4	
X 3	0	Х	0	0	
X 3.5	Х	Х	0	0	
X 4	0	0	Х	0	
X 4.5	Х	0	Х	0	
X 5	0	Х	Х	0	
X 5.5	Х	Х	Х	0	
X 6	0	0	0	Х	
X 6.5	Х	0	0	Х	
Χ7	0	Х	0	Х	
X 7.5	Х	Х	0	Х	
X 8	0	0	Х	Х	
X 8.5	Х	0	Х	Х	
X 9	Ó	X	Х	Х	
X 9.5	X	X	X	Х	

♦ We don't recommend you to setup your CPU ratio above 8 , it doesn't support now.

**For Auto Jumper setting:** 

### ★Note:

- 1. If you use 66, 100, 133 MHz CPU, we recommend you to set up your system speed to "Auto" value.
- We don't recommend you to set up your system speed to 75,83,112, 124, 140,150 MHz because these frequencies are not the standard specifications for CPU, Chipset and most of the peripherals. Whether your system can run under 75,83,112, 124, 140,150 MHz properly will depend on your hardware configurations: CPU, SDRAM, Cards, etc.

## Suspend To RAM Installation

### A.1 Introduce STR function:

Suspend-to-RAM (STR) is a Windows 98 ACPI sleep mode function. When recovering from STR (S3) sleep mode, the system is able, in just a few seconds, to retrieve the last "state" of the system before it went to sleep and recover to that state. The "state" is stored in memory (RAM) before the system goes to sleep. During STR sleep mode, your system uses only enough energy to maintain critical information and system functions, primarily the system state and the ability to recognize various "wake up" triggers or signals, respectively.

### A.2 STR function Installation

Please use the following steps to complete the STR function installation.

Step-By-Step Setup Step 1: To utilize the STR function, the system must be in Windows 98 ACPI mode.

Putting Windows 98 into ACPI mode is fairly easy.

#### Setup with Windows 98 CD:

- A. Insert the Windows 98 CD into your CD-ROM drive, select Start, and then Run.
- B. Type (without quotes) "D:\setup /p j" in the window provided. Hit the enter key or click OK. "In Windows 98 second edition version, all the bios version dated 12/01/99 or later are ACPI compatible. Just type" D:\Setup", the operating system will be installed as ACPI mode. "
- C. After setup completes, remove the CD, and reboot your system

(This manual assumes that your CD-ROM device drive letter is D:).

## Step 2:

#### (If you want to use STR Function, please set jumper JP11 Closed.)

### Step 3:

Power on the computer and as soon as memory counting starts, press <Del>. You will enter BIOS Setup. Select the item "POWER MANAGEMENT SETUP", then select "ACPI Sleep Type: S3 / STR". Remember to save the settings by pressing "ESC" and choose the "SAVE & EXIT SETUP" option.

Congratulation! You have completed the installation and now can use the STR function.
## A.3 How to put your system into STR mode?

There are two ways to accomplish this:

- 1. Choose the "Stand by" item in the "Shut Down Windows" area.
  - A. Press the "Start" button and then select "Shut Down"

B. Choose the "Stand by" item and press "OK"

Shut Do	wn Windows	×
	What do you want the computer to do?    Stand by   Shut down  Restart  Restart in <u>M</u> S-DOS mode	
	OK Cancel <u>H</u> elp	

- 2. Define the system "power on" button to initiate STR sleep mode:
  - A. Double click "My Computer" and then "Control Panel"

B. Double click the "Power Management" item.

🗟 Control Panel							×

Standby
OK Cancel Apply

#### Step 4:

Restart your computer to complete setup.

Now when you want to enter STR sleep mode, just momentarily press the "Power on" button..

### A.4 How to recover from the STR sleep mode?

There are six ways to "wake up" the system:

- 1. Press the "Power On" button.
- 2. Use the "Mouse Power On" function.
- 3. Use the "Resume by Alarm" function.
- 4. Use the "Modem Ring On" function.
- 5. Use the "Wake On LAN" function.
- 6. Use the "USB Device Wake up" function.

#### A.5 Notices:

- 1. In order for STR to function properly, several hardware and software requirements must be satisfied:
  - A. Your ATX power supply must comply with the ATX 2.01 specification (provide more than 720 mA 5V Stand-By current).
  - B. Your SDRAM must be PC-100 compliant.
- Jumper JP5 is provided to connect to the STR LED in your system chassis. [Your chassis may
  not provide this feature.] The STR LED will be illuminated when your system is in STR sleep
  mode.

# **Memory Installation**

The motherboard has 3 dual inline memory module (DIMM) sockets. The BIOS will automatically detects memory type and size. To install the memory module, just push it vertically into the DIMM Slot .The DIMM module can only fit in one direction due to the two notch. Memory size can vary between sockets.

Install memory in any combination table:

DIMM	168-pin SDRAM DIMM Modules	
DIMM1	Supports 16 / 32 / 64 / 128 / 256 / 512MB	X 1 pcs
DIMM2	Supports 16 / 32 / 64 / 128 / 256 / 512MB	X 1 pcs
DIMM3	Supports 16 / 32 / 64 / 128 / 256 / 512MB	X 1 pcs

# **BIOS Setup**

BIOS Setup is an overview of the BIOS Setup Program. The program that allows users to modify the basic system configuration. This type of information is stored in battery-backed CMOS RAM so that it retains the Setup information when the power is turned off.

## **ENTERING SETUP**

Power ON the computer and press <Del> immediately will allow you to enter Setup. If the message disappears before you respond and you still wish to enter Setup, restart the system to try again by turning it OFF then ON or pressing the "RESET" bottom on the system case. You may also restart by simultaneously press <Ctrl> - <Alt>- <Del> keys.

#### CONTROL KEYS

<f6></f6>	Load the default CMOS value from BIOS default table, only for Option Page Setup Menu
<f7></f7>	Load the Setup Defaults.
<f8></f8>	Reserved
<f9></f9>	Reserved
<f10></f10>	Save all the CMOS changes, only for Main Menu

## GETTING HELP

#### Main Menu

The on-line description of the highlighted setup function is displayed at the bottom of the screen.

#### Status Page Setup Menu / Option Page Setup Menu

Press F1 to pop up a small help window that describes the appropriate keys to use and the possible selections for the highlighted item. To exit the Help Window press <Esc>.

#### The Main Menu

Once you enter AMI BIOS CMOS Setup Utility, the Main Menu (Figure 1) will appear on the screen. The Main Menu allows you to select from nine setup functions and two exit choices. Use arrow keys to select among the items and press <Enter> to accept or enter the sub-menu.

AMIBIOS SIMPLE SETUP UTILITY-VERSION 1.21 (C) 1999 American Megatrends, Inc. All Rights Reserved

Figure 1: Main Menu

#### Standard CMOS Setup

This setup page includes all the items in standard compatible BIOS.

#### BIOS Features Setup

This setup page includes all the items of AMI special enhanced features.

#### Chipset Features Setup

This setup page includes all the items of chipset special features.

#### Power Management Setup

This setup page includes all the items of Green function features.

#### PnP/PCI Configurations

This setup page includes all the configurations of PCI & PnP ISA resources.

#### Load BIOS Defaults

Bios Defaults indicates the value of the system parameter which the system would be in the safe configuration.

#### Load Setup Defaults

Setup Defaults indicates the value of the system parameter which the system would be in the most appropriate configuration.

#### Integrated Peripherals

This setup page includes all onboard peripherals.

#### Hardware Monitor Setup

This setup page is auto detect fan and temperature status.

#### • Supervisor password

Change, set, or disable password. It allows you to limit access to the system and Setup, or just to Setup.

#### User password

Change, set, or disable password. It allows you to limit access to the system.

#### • IDE HDD auto detection

Automatically configure hard disk parameters.

## • Save & Exit Setup

Save CMOS value settings to CMOS and exit setup.

#### • Exit Without Saving

Abandon all CMOS value changes and exit setup.

## Standard CMOS Setup

The items in Standard CMOS Features Menu (Figure 2) are divided into 9 categories. Each category includes no, one or more than one setup items. Use the arrows to highlight the item and then use the <PgUp> or <PgDn> keys to select the value you want in each item.

AMIBIOS SETUP – STA ( C ) 1999 American Megatre	NDARD CMOS SETUP nds, Inc. All Rights Reserved
Date (mm/dd/yyyy) : Thu Feb 24, 2000 Time (hh/mm/ss) : 10:36:24 TYPE SIZE CYLS HEAD P	RECOMP LANDZ SECTOR MODE

Month:         Jan – Dec         ES           Day:         01 – 31         ↑↓           Year :         1990–2099         PI           (S         (S)         (S)	SC : Exit : Select Item J/PD/+/– : Modify hift)F2 : Color

Figure 2: Standard CMOS Setup

#### • Date

The date format is <Week>, <Month>, <Day>, <Year>.

Week	The week, from Sun to Sat, determined by the BIOS and is display-only
Month	The month, Jan. Through Dec.
Day	The day, from 1 to 31 (or the maximum allowed in the month)
Year	The year, from 1990 through 2099

#### • Time

The times format in <hour> <minute> <second>. The time is calculated base on the 24-hour military-time clock. For example, 1 p.m. is 13:00:00.

#### • IDE Primary Master, Slave / Secondary Master, Slave

The category identifies the types of hard disk from drive C to F that has been installed in the computer. There are two types: auto type, and user definable type. User type is user-definable; Auto type which will automatically detect HDD type.

Note that the specifications of your drive must match with the drive table. The hard disk will not work properly if you enter improper information for this category.

If you select User Type, related information will be asked to enter to the following items. Enter the information directly from the keyboard and press <Enter>. Such information should be provided in the documentation form your hard disk vendor or the system manufacturer.

CYLS.	Number of cylinders
HEADS	number of heads
PRECOMP	write precomp
LANDZONE	Landing zone
SECTORS	number of sectors

If a hard disk has not been installed select NONE and press <Enter>.

## • Drive A type / Drive B type

The category identifies the types of floppy disk drive A or drive B that has been installed in the computer.

None	No floppy drive installed
360K, 5.25 in.	5.25 inch PC-type standard drive; 360K byte capacity.
1.2M, 5.25 in.	5.25 inch AT-type high-density drive; 1.2M byte capacity (3.5 inch
	when 3 Mode is Enabled).
720K, 3.5 in.	3.5 inch double-sided drive; 720K byte capacity
1.44M, 3.5 in.	3.5 inch double-sided drive; 1.44M byte capacity.
2.88M, 3.5 in.	3.5 inch double-sided drive; 2.88M byte capacity.

#### Boot Sector Virus Protection

If it is set to enable, the category will flash on the screen when there is any attempt to write to the boot sector or partition table of the hard disk drive. The system will halt and the following error message will appear in the mean time. You can run anti-virus program to locate the problem.

Enabled	Activate automatically when the system boots up causing a warning message to appear when anything attempts to access the boot sector or hard disk partition table
Disabled	No warning message to appear when anything attempts to access the boot sector or hard disk partition table. (Default Value)

#### Memory

The category is display-only which is determined by POST (Power On Self Test) of the BIOS. Base Memory

The POST of the BIOS will determine the amount of base (or conventional) memory installed in the system.

The value of the base memory is typically 512 K for systems with 512 K memory installed on the motherboard, or 640 K for systems with 640 K or more memory installed on the motherboard.

#### Extended Memory

The BIOS determines how much extended memory is present during the POST.

This is the amount of memory located above 1 MB in the CPU's memory address map.

#### **Other Memory**

This refers to the memory located in the 640 K to 1024 K address space. This is memory that can be used for different applications.

DOS uses this area to load device drivers to keep as much base memory free for application programs. Most use for this area is Shadow RAM

# **BIOS Features Setup**

AMIBIOS ( C ) 1999 A	SETUP – BIOS American Megatr	FEATURES CMOS SE ends, Inc. All Rights Res	TUP served

Figure 3: BIOS Features Setup

## • 1st / 2nd / 3rd Boot Device

The default value is Floppy or LS-120 / ZIP A: or ATAPI ZIP C: or CDROM or SCSI or NET WORK / I20 or IDE-0~IDE-3 or Disabled.

Floppy	Boot Device by Floppy.
LS-120 / ZIP A:	Boot Device by LS-120 / ZIP A:.
CDROM	Boot Device by CDROM.
SCSI	Boot Device by SCSI.
NETWORK	Boot Device by NETWORK.
IDE-0~IDE-3	Boot Device by IDE-0~IDE-3.
Disabled	Boot Device by Disabled.
ATAPI ZIP C:	Boot Device by ATAPI ZIP C:.

#### • S.M.A.R.T. for Hard Disks

Enable	Enable S.M.A.R.T. Hard for Disks.
Disable	Disable S.M.A.R.T. Hard for Disks. (Default Value)

Boot Up Num-Lock

On	Keypad is number keys. (Default Value)
Off	Keypad is arrow keys.

## • Floppy Drive Seek

During POST, BIOS will determine if the floppy disk drive installed is 40 or 80 tracks. 360 type is 40 tracks while 720 , 1.2 and 1.44 are all 80 tracks.

BIOS searches for floppy disk drive to determine if it is 40 or 80 tracks.
Note that BIOS can not tell from 720, 1.2 or 1.44 drive type as they are all
80 tracks.
BIOS will not search for the type of floppy disk drive by track number. Note
that there will not be any warning message if the drive installed is 360.
(Default Value)

#### • Password Check

Setup	Set Password Check to Setup. (Default Value)
Always	Set Password Check to Always.

• Processor Serial Number (Only support Pentium<sup>®</sup> !!! Processor)

Disabled	Disabled CPU Serial Number. (Default Value)
Enabled	Enabled CPU Serial Number.

	system will automatically power off.	
75°C / 167°F	Monitor CPU Temp. at 75°C / 167°F, if Temp. > 75°C / 167°F	
	system will automatically power off.	

• Current CPU Temp. (°C / °F)

Detect CPU Temperature automatically.

• Current System Tem. (°C / °F)

Detect System Temperature automatically.

Case Status

If the case is closed, "Case Status" will show "Closed". If the case have been opened, "Case Opened" will show "Open".

• Current CPU FAN Speed

Detect CPU Fan speed status automatically .

• Current System FAN Speed

Detect System Fan speed status automatically .

• Current Voltage (V) VCORE / +3.3V / +12V / +5V

Detect system's voltage status automatically.

## Set Supervisor / User Password

When you select this function, the following message will appear at the center of the screen to assist you in creating a password.

AMIBIOS SIMPLE SETUP UTILITY-VERSION 1.21 ( C ) 1999 American Megatrends, Inc. All Rights Reserved			
STANDARD CMOS SETUP		INTEGRATED PERIPHERALS	
BIOS FEATURES SETUP		HARDWARE MONITOR SETUP	
CHIPSET FEATURES SETUP		SUPERVISOR PASSWORD	
POWER MANAGEMENT SETUP		USER PASSWORD	
PNP/PCI CONFIGURATION		IDE HDD AUTO DETECTION	
LOAD BIOS DEFAULTS Enter ne		ew supervisor password:	
LOAD SETUP DEFAULTS		EXIT WITHOUT SAVING	
ESC : Quit ↑↓→← : Select Item (Shift) F2 : Change Color F5 : Old Values F6 : Load BIOS Defaults F7: Load Setup Defaults F10: Save & Exit			
Chang /Set /Disabled Password			

#### Figure 11: Password Setting

Type the password, up to eight characters, and press <Enter>. The password typed now will clear the previously entered password from CMOS memory. You will be asked to confirm the password. Type the password again and press <Enter>. You may also press <Esc> to abort the selection and not enter a password.

To disable password, just press <Enter> when you are prompted to enter password. A message "PASSWORD DISABLED" will appear to confirm the password being disabled. Once the password is disabled, the system will boot and you can enter Setup freely.

If you select "Always" at "Password Check" in BIOS Features Setup Menu, you will be prompted for the password every time the system is rebooted or any time you try to enter Setup Menu. If you select "Setup" at "Password Check" in BIOS Features Setup Menu, you will be prompted only when you try to enter Setup.

# **IDE HDD AUTO Detection**

AMIBIOS SETUP – STANDARD CMOS SETUP ( C ) 1999 American Megatrends, Inc. All Rights Reserved		
Date (mm/dd/yyyy) : Thu Feb 24, 2000 Time (hh/mm/ss) : 10:36:24 TYPE SIZE CYLS HEAD PRECOMP LANDZ SECTOR MODE

Figure 12: IDE HDD Auto Detection

Type "Y" will accept the H.D.D. parameter reported by BIOS.

Type "N" will keep the old H.D.D. parameter setup. If the hard disk cylinder number is over 1024, then the user can select LBA mode or LARGER mode for DOS partition larger than 528 MB.

# Save & Exit Setup

AMIBIOS SIMPLE SETUP UTILITY-VERSION 1.21 ( C ) 1999 American Megatrends, Inc. All Rights Reserved			
STANDARD CMOS SETUP		INTEGRATED PERIPH	ERALS
BIOS FEATURES SETUP		HARDWARE MONITOR SETUP	
CHIPSET FEATURES SETUP		SUPERVISOR PASSWORD	
POWER MANAGEMENT SETUP		USER PASSWORD	
PNP/PCI CONFI			TION
LOAD BIOS DEF	SAVE to CMOS and EXIT(Y/N)? Y		
LOAD SETUP DEFAULTS		EXIT WITHOUT SAVIN	G
ESC : Quit ↑↓→← : Select Item (Shift) F2 : Change Color F5 : Old Values F6 : Load BIOS Defaults F7: Load Setup Defaults F10: Save & Exit			
Save Data to CMOS & Exit Setup			

Figure 13: Save & Exit Setup

Type "Y" will quit the Setup Utility and save the user setup value to RTC CMOS.

Type "N" will return to Setup Utility.

# **Exit Without Saving**

AMIBIOS SIMPLE SETUP UTILITY-VERSION 1.21 ( C ) 1999 American Megatrends, Inc. All Rights Reserved			
STANDARD CMOS SETUP	INTEGRATED PERIPHERALS		
BIOS FEATURES SETUP	HARDWARE MONITOR SETUP		
CHIPSET FEATURES SETUP	SUPERVISOR PASSWORD		
POWER MANAGEMENT SETUP	USER PASSWORD		
PNP/PCI CONFIG	CTION		
LOAD BIOS DEFA Quit without	Quit without saving (Y/N) ? N		
LOAD SETUP DEFAULTS	EXIT WITHOUT SAVING

Abandon all Datas & Exit Setup			

Figure 14: Exit Without Saving

Type "Y" will quit the Setup Utility without saving to RTC CMOS.

Type "N" will return to Setup Utility.

#### Appendix A: BIOS Flash Procedure

BIOS update procedure:

- ✓ Please check your BIOS vendor (AMI or AWARD) on the motherboard.
- ✓ It is recommended you copy the AWDFlash.exe or AMIFlash.exe and the BIOS binary files into the directory you made in your hard disk. 【i.e:C:\>Utility\(C:\>Utility\ (C:\>Utility : denotes the driver and the directory where you put the flash utilities and BIOS file in.)】
- ✓ Restart your computer into MS-DOS mode or command prompt only for Win95/98, go into the directory where the new BIOS file are located use the utility AWDFlash.exe or AMIFlash.exe to update the BIOS.
- ✓ Type the following command once you have enter the directory where all the files are located C:\utility\ AWDFlash or AMIFlash <filename of the BIOS binary file intended for flashing>.
- ✓ Once the process is finished, reboot the system.

● Note: Please download the newest BIOS from our website (www.magic-pro.com) or contact your local dealer for the file.

## Appendix B: Acronyms

Acor.	Meaning
ACPI	Advanced Configuration and Power Interface
POST	Power-On Self Test
LAN	Local Area Network
ECP	Extended Capabilities Port
APM	Advanced Power Management
DMA	Direct Memory Access
MHz	Megahertz
ESCD	Extended System Configuration Data
CPU	Central Processing Unit
SMP	Symmetric Multi-Processing
USB	Universal Serial Bus
OS	Operating System
ECC	Error Checking and Correcting
IDE	Integrated Dual Channel Enhanced
SCI	Special Circumstance Instructions
LBA	Logical Block Addressing
EMC	Electromagnetic Compatibility
BIOS	Basic Input / Output System
SMI	System Management Interrupt
IRQ	Interrupt Request
NIC	Network Interface Card
A.G.P.	Accelerated Graphics Port
S.E.C.C.	Single Edge Contact Cartridge
LED	Light Emitting Diode
EPP	Enhanced Parallel Port
CMOS	Complementary Metal Oxide Semiconductor
I/O	Input / Output
ESD	Electrostatic DISCHARGE
OEM	Original Equipment Manufacturer
SRAM	Static Random Access Memory
VID	Voltage ID
DMI	Desktop Management Interface
MIDI	Musical Interface Digital Interface
IOAPIC	Input Output Advanced Programmable Input Controller
DIMM	Dual Inline Memory Module
DRAM	Dynamic Random Access Memory
PAC	PCI A.G.P. Controller
AMR	Audio Modem Riser

To be continued...

Acor.	Meaning
PCI	Peripheral Component Interconnect
RIMM	Rambus in-line Memory Module
DRM	Dual Retention Mechanism
ISA	Industry Standard Architecture
MTH	Memory Translator Hub
CRIMM	Continuity RIMM
